# C196 - Project

Monday, August 13, 2018   7:14 PM

The Main screen provides access to the list of terms and quick access to the current term.

This screen list all the terms and terms can be added with the corner button.

This is an example term screen that can be marked as the active term or deleted.

The term view screen provides access to the course list for that term.

The course list screen provides a quick view of all that term's courses, start and end dates, and current status. New courses can be added using the corner button.
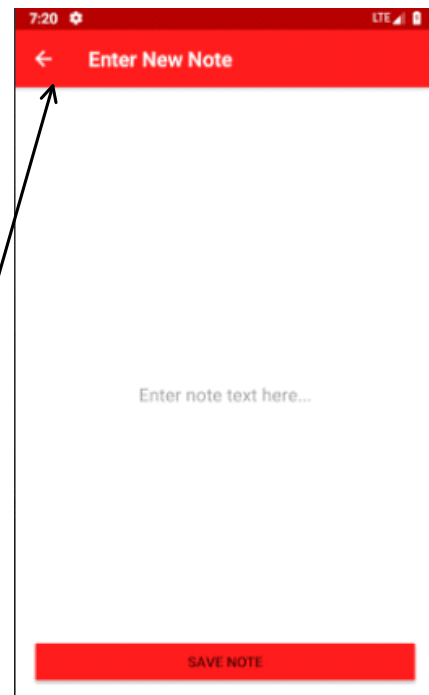

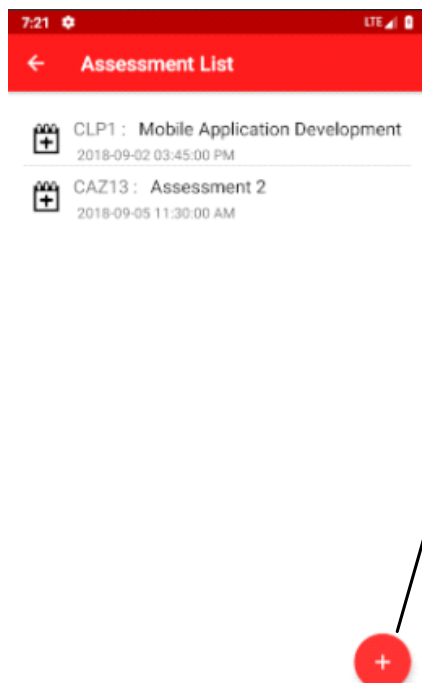

This is the course creation screen.

This is a course detail screen where course notes and assessments can be added.

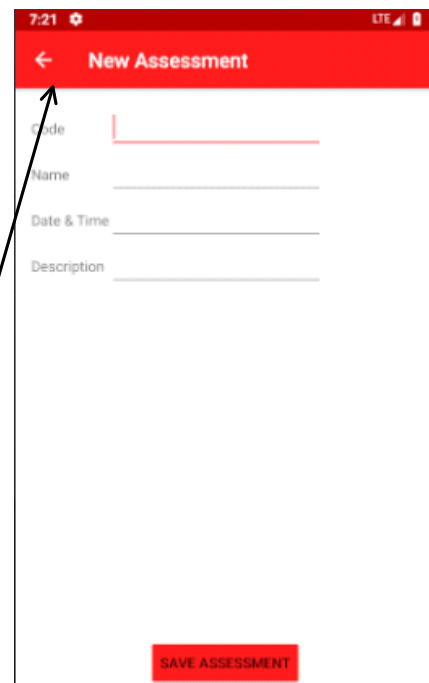

This screen displays all the notes for this course and more can be added.

Notes can be shared with the drop menu.

The assessment list screen displays assessments for each course including the date and time.

New assessments can be added.

By selecting enable notifications, alarms are created to notify the user of upcoming deadlines. Additional notes can be added for specific assessments.

Notifications can also be created for each course. Courses can be started, dropped, and deleted as needed.
